E & OE
VERSION 1 : AUGUST 2014

NEW COLLECTION 2015

COLLECTION 2015

New season, new colours, new fabrics, new designs and new materials. Essential elements that combine to define changes, novelties and innovations - the building blocks that form a strong foundation in the 2015 collection from Gloster.

Mix and match two frame colours with an inspiring palette of ten new fabrics to create your own unique style. This, combined with a fresh range of new designs and the introduction of new and functional materials, sets the scene for a great season and moments to share.

TEAK CRAFTS AND INNOVATION

Run by a multinational team and employing over 800 people, the Gloster facility in Indonesia is both responsible, efficient and responsive. From the drafting team to calculation specialists. From artisanal weavers to carpenters, our team have been part of the Gloster family for many years. All the teak we purchase comes from legally managed plantations and we take great care that our manufacturing activities follow sound environmental practices for the good of both our own people and the local communities.

And although our expertise started with teak, it hasn't stopped there. More than 10 million pieces of furniture later and Gloster is now expert in a variety of materials, including aluminium, stainless steel and upholstery.

MIX & MATCH CONCEPT

Same, matching, same, co-ordinated, same, same, same...

Who needs it? With a series of uniquely styled products Gloster offers the opportunity to mix and match.

An extensive introduction of mix and match product supports this style concept. Outdoor dining chair, table and seating designs are available in any combination of four sophisticated fabrics, two powder coat finishes and come with optional burnished teak accents...

Why be ordinary?

BUFFED TEAK

Gloster buffed teak benefits from an enhanced surface preparation procedure, where the natural oils already contained within the teak are brought to the surface and burnished to produce a rich sheen and a consistent colour.

All Gloster teak items also now come with a 10 year warranty.

GRID

PRODUCT

Grid is a name that describes both function and mind-set. A grid of complementary units forms the basis of a totally flexible system where customers are able to combine various individual elements to meet their specific needs. The shapes of the various elements enable the finished seating unit to be constructed in multiple ways and even directions.

BAY

PRODUCT

Not a direct inspiration but an overall feeling or emotion of sitting by the bay. The reclined position emphasises an introverted and relaxed state of mind, hence the name - Bay.

TRAY

PRODUCT

Outdoor lounge - the place where you hang out, chill out and kick back. The sofa is welcoming and the double function of the arm / backrest tray defines the whole concept and is at your disposal the full length of the sofa.

BEPAL

PRODUCT

Like shells connect almost seamlessly at the joint, so the two parts of this chair join at the back to make an extremely comfortable lounging chair. The chair is offered in two colours of frame / weave.

CRADLE

PRODUCT

It's all about creating defined rooms, your own private oasis in the outdoor area, but still open and exposed to the elements - with a sense of enclosure. Luxurious for one, but big enough for two. This, combined with the natural backrest and the option for adjustable sun shading, makes for a truly comfortable experience.

ELEMENTS

- 8810 : Cradle Day Bed
- 8881 : Cradle Day Bed - Pair of Side Screens
- 8882 : Cradle Day Bed - Roof Screen

BELLS

PRODUCT

The inspiration is almost too obvious - two bells joined together to make up the shape of this small side table. The organic and fluid lines will make an eye-catching addition to any outdoor area.

SWAY

PRODUCT

In outdoor situations we often spend more time relaxing and lounging, and when dining we often take our time. So why not make the situation as comfortable as possible, with a sling seat construction that is flexible enough to provide a soft landing - a bit like swaying grass. Sway comes as both a cantilever version or with a teak frame.

DANSK

PRODUCT

Traditional and modern materials combine in the Dansk collection to create imposing yet welcoming forms. Light, tactile and pleasant to the eye, Dansk strikes a familiar chord with its clean, tapering lines that hark back to a classic Danish furniture design for all seasons.

MAZE

PRODUCT
Distinctive interwoven straps give the Maze collection its name which takes conventional woven furniture to a new dimension. Working with soft, polypropylene outdoor straps woven over angular teak frames, the unique design offers both visual impact and exceptional comfort. The rope version utilises UV stabilised, PVC coated polyester rope on the seat and back.

ASTA

PRODUCT
The idea behind the design was the mix of materials and the shapes. The stainless steel frame has all the refinement of an indoor, anodised surface but with the practicality and soft touch of a powder coated surface. This, combined with the gently curved backrest, gives the chair a striking yet very welcoming look.

CURVE

PRODUCT

Like the desert sand define the dunes, so the soft curve in the backrest defines this chair. Even though the materials are weatherproof and durable, the inspiration and the task was to make the chair both comfortable and welcoming.

SPLIT

PRODUCT

The legs of the Split table have a very characteristic look with an inverted 'Y' construction and tapering form, which emphasises a light and subtle connection to the ground. The uneven cutting of the table top adds an organic look, while tricking the eye with a visual surprise.

CARVER

PRODUCT

In the same way that an artist carves in stone or wood to create a form, the same way of thinking has been applied to this table, where the cross-rail and legs have been shaped like pieces cut from a solid block.
